Summary

This report aggregates 4 experiments spanning over the following subjects:
service2, *service1*

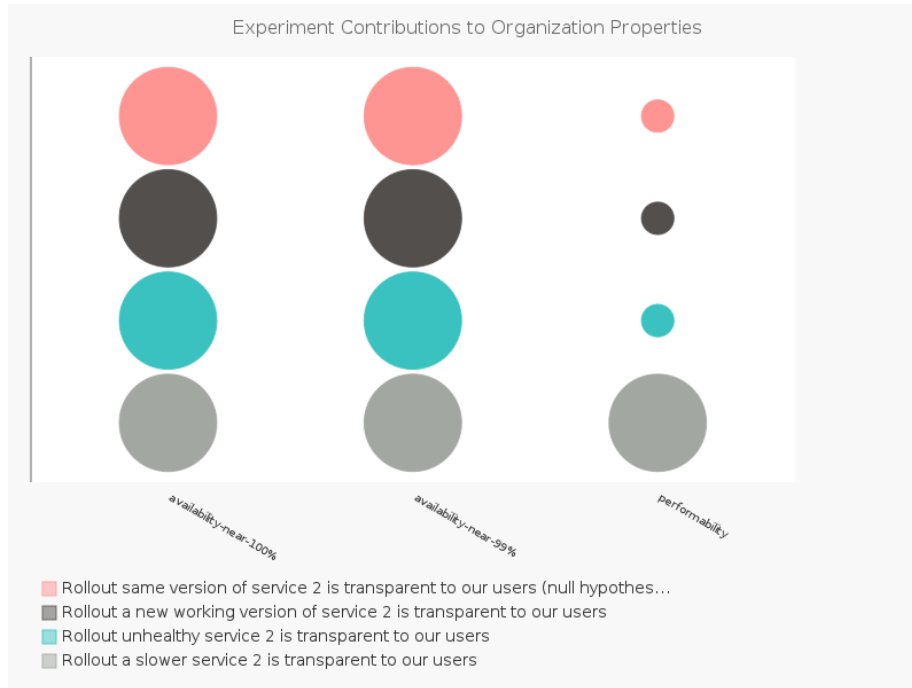

Contributions

Contributions surface the properties this collection of experiments target in order to improve the confidence and trust in the system.

The aggregated 4 experiments cover 3 distinct contributions:

Experiment Contributions Breakdown The breakdown of impacts each experiment contributes to for these system properties¹:

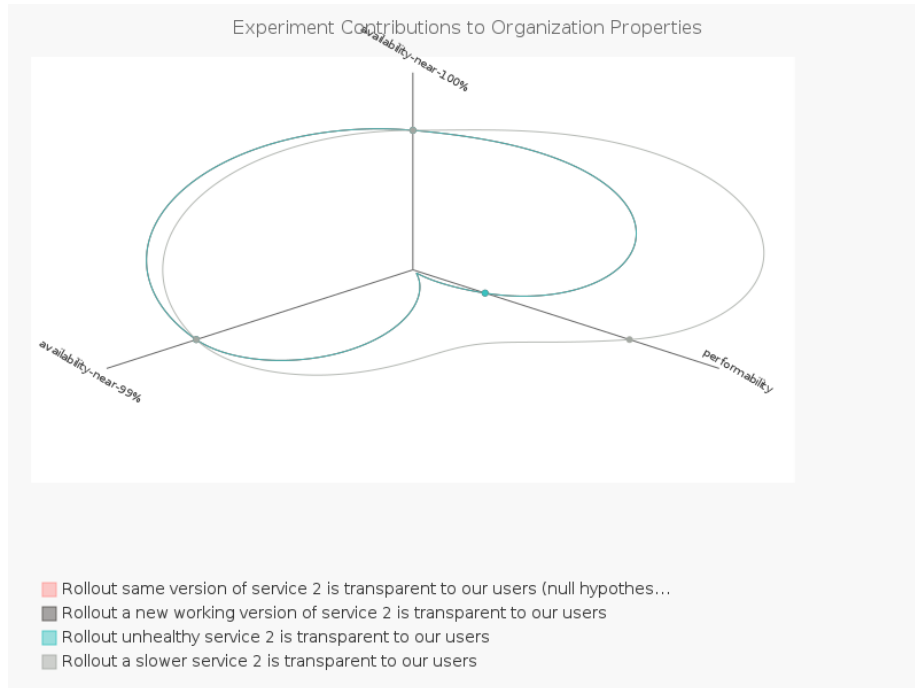

Sparse lines indicate a given experiment focused on a specific subset of contributions.

Sparse columns indicate that a given contribution was seldom impacted by this collection of experiments.

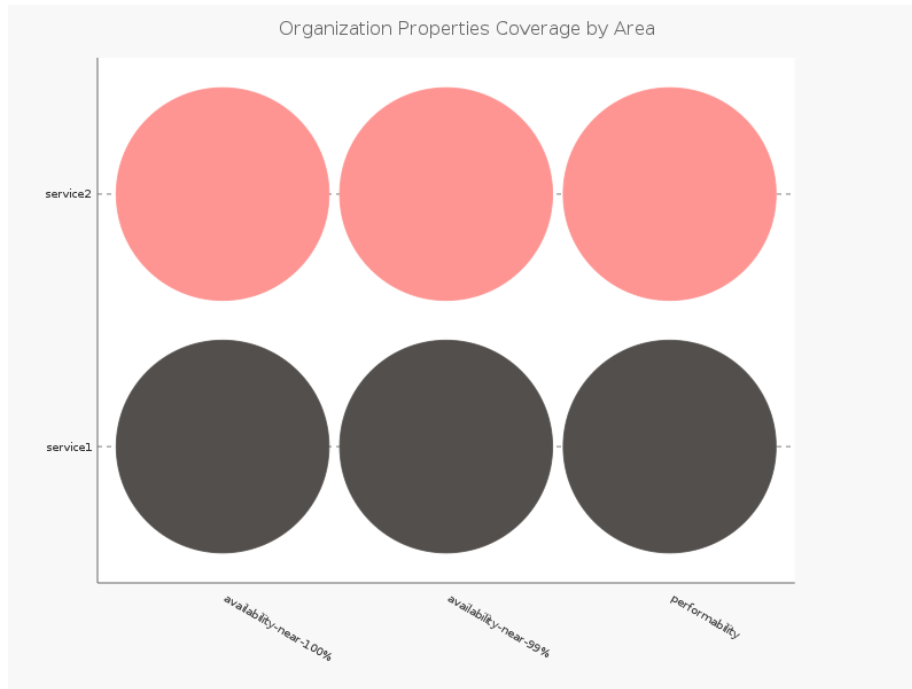

¹Empty dots indicate an experiment is explicitly not addressing a given contribution while missing dots indicate no data for a given contribution.

Another view of the same data:

Areas Contributions Breakdown

The distribution of areas impacted by these contributions²:

Sparse lines indicate a given tag contributes only to a specific subset of system property.

Sparse columns indicate that a given contribution impacts moderately areas covered by the experiments.

²Empty dots indicate a tag is explicitly not addressing a given contribution while missing dots indicate no data for a given contribution.

Experiments

Rollout same version of service 2 is transparent to our users (null hypothesis)

Rolling out a backend service should not impact the service our users rely on

Summary

Status	completed
Tagged	service1, service2
Executed From	sylvain-work
Platform	Linux-5.0.0-15-generic-x86_64-with-Ubuntu-19.04-disco
Started	Mon, 20 May 2019 13:44:09 GMT
Completed	Mon, 20 May 2019 13:44:41 GMT
Duration	32 seconds

Definition

The experiment was made of 2 actions, to vary conditions in your system, and 2 probes, to collect objective data from your system during the experiment.

Organization Contributions

An estimate of relative system properties this experiment contributes to:

Contribution	Impact
availability-near-100%	high
availability-near-99%	high
performability	low

The “*none*” value for an impact indicates that this experiment explicitly does not address that specific property.

Steady State Hypothesis

The steady state hypothesis this experiment tried was “**If users see errors, it may be due to a rollout breaking the link between services**”.

Before Run

The steady state was verified

Probe	Tolerance	Verified
no-http-errors-returned-from-service	{'type': 'jsonpath', 'path': '\$.data.result.*[?(@.value[1]!="0"]', 'count': 0}	True

After Run

The steady state was verified

Probe	Tolerance	Verified
no-http-errors-returned-from-service	{‘type’: ‘jsonpath’, ‘path’: ‘\$.data.result.*[?(@.value[1]!=“0”)]’, ‘count’: 0}	True

Method

The experiment method defines the sequence of activities that help gathering evidence towards, or against, the hypothesis.

The following activities were conducted as part of the experimental’s method:

Type	Name
action	initiate-rollout-v1-of-service2
action	pretend-users-in-background
probe	read-deployment-status
probe	read-counter-for-the-past-30-seconds

Result

The experiment was conducted on Mon, 20 May 2019 13:44:09 GMT and lasted roughly 32 seconds.

Action - initiate-rollout-v1-of-service2

Status	succeeded
Background	False
Started	Mon, 20 May 2019 13:44:09 GMT
Ended	Mon, 20 May 2019 13:44:09 GMT
Duration	0 seconds

The action provider that was executed:

Type	python
Module	chaosk8s.deployment.actions
Function	set_deployment_image
Arguments	{‘deployment_name’: ‘service2’, ‘container_name’: ‘service2’, ‘image’: ‘lawouach/service2:v1’}

Action - pretend-users-in-background

Status	succeeded
Background	False
Started	Mon, 20 May 2019 13:44:10 GMT
Ended	Mon, 20 May 2019 13:44:10 GMT
Duration	0 seconds

The action provider that was executed:

Type	python
Module	load
Function	single
Arguments	{‘url’: ‘\${counter_service_url}’, ‘duration’: 20}

Probe - read-deployment-status

Status	succeeded
Background	False
Started	Mon, 20 May 2019 13:44:10 GMT
Ended	Mon, 20 May 2019 13:44:35 GMT
Duration	25 seconds

The probe provider that was executed:

Type	python
Module	chaosk8s.deployment.probes
Function	collect_deployment_status
Arguments	{‘deployment_name’: ‘service2’, ‘duration’: 25}

Probe - read-counter-for-the-past-30-seconds

Status	succeeded
Background	False
Started	Mon, 20 May 2019 13:44:35 GMT
Ended	Mon, 20 May 2019 13:44:35 GMT
Duration	0 seconds

The probe provider that was executed:

Type	python
Module	chaosprometheus.probes
Function	query_interval
Arguments	{‘query’: “counter{name=‘service1’}”, ‘start’: ‘30 seconds ago’, ‘end’: ‘now’}

Appendix

Action - initiate-rollout-v1-of-service2

The *action* returned the following result:

None

Action - pretend-users-in-background

The *action* returned the following result:

None

Probe - read-deployment-status

The *probe* returned the following result:

[illegible]

```

    ['Progressing', 'True', 'NewReplicaSetAvailable']],
  [['Available', 'True', 'MinimumReplicasAvailable'],
   ['Progressing', 'True', 'NewReplicaSetAvailable']],
  [['Available', 'True', 'MinimumReplicasAvailable'],
   ['Progressing', 'True', 'NewReplicaSetAvailable']],
  [['Available', 'True', 'MinimumReplicasAvailable'],
   ['Progressing', 'True', 'NewReplicaSetAvailable']]

```

Probe - read-counter-for-the-past-30-seconds

The *probe* returned the following result:

```

{'data': {'result': [{'metric': {'__name__': 'counter',
                                'endpoint': 'http',
                                'host': 'service1-5cb868f5bf-8xg99',
                                'instance': '10.1.1.132:8000',
                                'job': 'service1',
                                'name': 'service1',
                                'namespace': 'default',
                                'path': '/',
                                'pod': 'service1-5cb868f5bf-8xg99',
                                'service': 'service1',
                                'version': '2'},
                      'values': [[1558359845.7, '37'],

Executed From	sylvain-work
Platform	Linux-5.0.0-15-generic-x86_64-with-Ubuntu-19.04-disco
Started	Mon, 20 May 2019 13:53:19 GMT
Completed	Mon, 20 May 2019 13:53:46 GMT
Duration	27 seconds

Definition

The experiment was made of 2 actions, to vary conditions in your system, and 2 probes, to collect objective data from your system during the experiment.

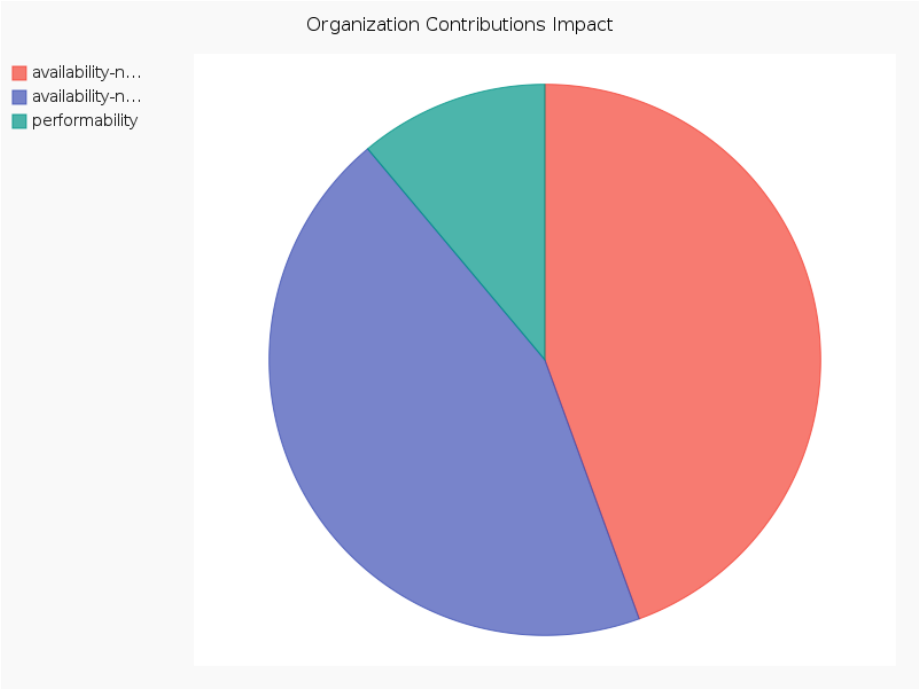

Organization Contributions

An estimate of relative system properties this experiment contributes to:

Contribution	Impact
availability-near-100%	high
availability-near-99%	high
performability	low

The “*none*” value for an impact indicates that this experiment explicitly does

not address that specific property.

Steady State Hypothesis

The steady state hypothesis this experiment tried was “**If users see errors, it may be due to a rollout breaking the link between services**”.

Before Run

The steady state was verified

Probe	Tolerance	Verified
no-http-errors-returned-from-service	{'type': 'jsonpath', 'path': '\$.data.result.*[?(@.value[1]!="0")]', 'count': 0}	True

After Run

The steady state was verified

Probe	Tolerance	Verified
no-http-errors-returned-from-service	{‘type’: ‘jsonpath’, ‘path’: ‘\$.data.result.*[?(@.value[1]!="0")]', ‘count’: 0}	True

Method

The experiment method defines the sequence of activities that help gathering evidence towards, or against, the hypothesis.

The following activities were conducted as part of the experimental’s method:

Type	Name
action	initiate-rollout-v2-of-service2
action	pretend-users-in-background
probe	read-deployment-status
probe	read-counter-for-the-past-30-seconds

Result

The experiment was conducted on Mon, 20 May 2019 13:53:19 GMT and lasted roughly 27 seconds.

Action - initiate-rollout-v2-of-service2

Status	succeeded
Background	False
Started	Mon, 20 May 2019 13:53:20 GMT
Ended	Mon, 20 May 2019 13:53:20 GMT
Duration	0 seconds

The action provider that was executed:

Type	python
Module	chaosk8s.deployment.actions
Function	set_deployment_image
Arguments	{‘deployment_name’: ‘service2’, ‘container_name’: ‘service2’, ‘image’: ‘lawouach/service2:v2’}

Action - pretend-users-in-background

Status	succeeded
Background	False
Started	Mon, 20 May 2019 13:53:20 GMT
Ended	Mon, 20 May 2019 13:53:20 GMT
Duration	0 seconds

The action provider that was executed:

Type	python
Module	load
Function	single
Arguments	{‘url’: ‘\${counter_service_url}’, ‘duration’: 20}

Probe - read-deployment-status

Status	succeeded
Background	False
Started	Mon, 20 May 2019 13:53:20 GMT
Ended	Mon, 20 May 2019 13:53:45 GMT
Duration	25 seconds

The probe provider that was executed:

Type	python
Module	chaosk8s.deployment.probes
Function	collect_deployment_status
Arguments	{‘deployment_name’: ‘service2’, ‘duration’: 25}

Probe - read-counter-for-the-past-30-seconds

Status	succeeded
Background	False
Started	Mon, 20 May 2019 13:53:46 GMT

```

Rollout a slower service 2 is transparent to our users

Rolling out a backend service should not impact the service our users rely on

Summary

Status	failed
Tagged	service1, service2
Executed From	sylvain-work
Platform	Linux-5.0.0-15-generic-x86_64-with-Ubuntu-19.04-disco
Started	Mon, 20 May 2019 14:01:05 GMT
Completed	Mon, 20 May 2019 14:01:38 GMT
Duration	33 seconds

Definition

The experiment was made of 2 actions, to vary conditions in your system, and 2 probes, to collect objective data from your system during the experiment.

Organization Contributions

An estimate of relative system properties this experiment contributes to:

Contribution	Impact
availability-near-100%	high
availability-near-99%	high
performability	high

The “*none*” value for an impact indicates that this experiment explicitly does not address that specific property.

Steady State Hypothesis

The steady state hypothesis this experiment tried was “**If users see errors, it may be due to a rollout breaking the link between services**”.

Before Run

The steady state was verified

Probe	Tolerance	Verified
no-http-errors-returned-from-service	{'type': 'jsonpath', 'path': '\$.data.result.*[?(@.value[1]!="0"]', 'count': 0}	True

After Run

The steady state was not verified.

Probe	Tolerance	Verified
no-http-errors-returned-from-service	{‘type’: ‘jsonpath’, ‘path’: ‘\$.data.result.*[?(@.value[1]!="0")]', ‘count’: 0}	False

Method

The experiment method defines the sequence of activities that help gathering evidence towards, or against, the hypothesis.

The following activities were conducted as part of the experimental’s method:

Type	Name
action	initiate-rollout-v4-of-service2
action	pretend-users-in-background
probe	read-deployment-status
probe	read-counter-for-the-past-30-seconds

Result

The experiment was conducted on Mon, 20 May 2019 14:01:05 GMT and lasted roughly 33 seconds.

Action - initiate-rollout-v4-of-service2

Status	succeeded
Background	False
Started	Mon, 20 May 2019 14:01:11 GMT
Ended	Mon, 20 May 2019 14:01:11 GMT
Duration	0 seconds

The action provider that was executed:

Type	python
Module	chaosk8s.deployment.actions
Function	set_deployment_image
Arguments	{‘deployment_name’: ‘service2’, ‘container_name’: ‘service2’, ‘image’: ‘lawouach/service2:v4’}

Action - pretend-users-in-background

Status	succeeded
Background	False
Started	Mon, 20 May 2019 14:01:11 GMT
Ended	Mon, 20 May 2019 14:01:11 GMT
Duration	0 seconds

The action provider that was executed:

Type	python
Module	load
Function	single
Arguments	{'url': '\${counter_service_url}', 'duration': 20}

Probe - read-deployment-status

Status	succeeded
Background	False
Started	Mon, 20 May 2019 14:01:11 GMT
Ended	Mon, 20 May 2019 14:01:36 GMT
Duration	25 seconds

The probe provider that was executed:

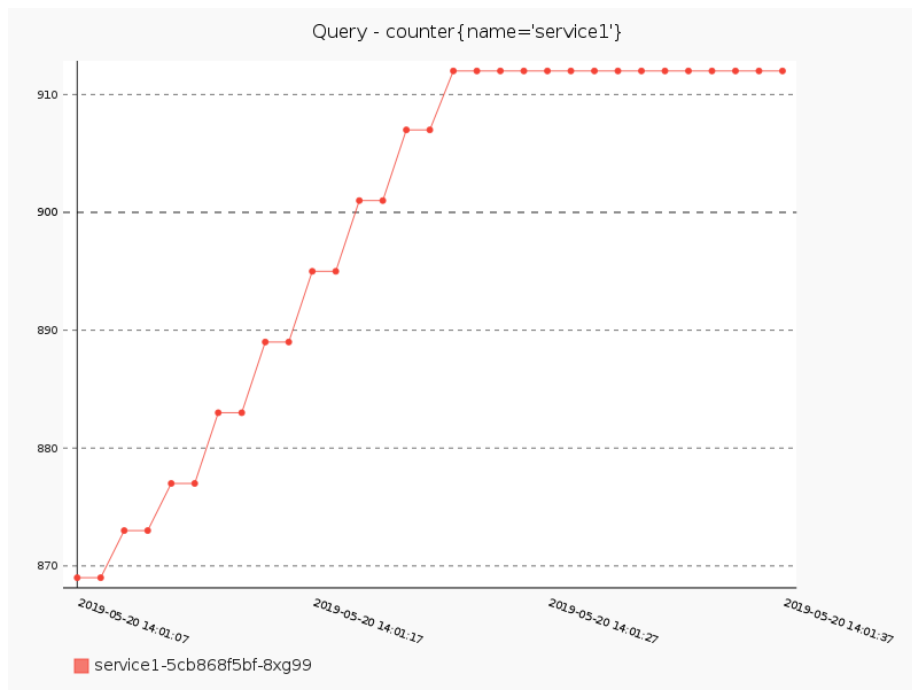

Type	python
Module	chaosk8s.deployment.probes
Function	collect_deployment_status
Arguments	{'deployment_name': 'service2', 'duration': 25}

Probe - read-counter-for-the-past-30-seconds

Status	succeeded
Background	False
Started	Mon, 20 May 2019 14:01:37 GMT
Ended	Mon, 20 May 2019 14:01:37 GMT
Duration	0 seconds

The probe provider that was executed:

Type	python
Module	chaosprometheus.probes
Function	query_interval
Arguments	{'query': "counter{name='service1'}", 'start': '30 seconds ago', 'end': 'now'}

Appendix

Action - initiate-rollout-v4-of-service2

The *action* returned the following result:

None

Action - pretend-users-in-background

The *action* returned the following result:

None

Probe - read-deployment-status

The *probe* returned the following result:

[illegible]

```

    ['Progressing', 'True', 'NewReplicaSetAvailable']],
  [['Available', 'True', 'MinimumReplicasAvailable'],
   ['Progressing', 'True', 'NewReplicaSetAvailable']],
  [['Available', 'True', 'MinimumReplicasAvailable'],
   ['Progressing', 'True', 'NewReplicaSetAvailable']],
  [['Available', 'True', 'MinimumReplicasAvailable'],
   ['Progressing', 'True', 'NewReplicaSetAvailable']]

```

Probe - read-counter-for-the-past-30-seconds

The *probe* returned the following result:

```

{'data': {'result': [{'metric': {'__name__': 'counter',
                                'endpoint': 'http',
